

Precision Assembly Technologies, Inc. is committed to the AS9100 Quality Management System and complies with its requirements and continually improves system effectiveness in meeting and exceeding customer expectations.

We believe customer satisfaction is directly related to satisfying all customer requirements, superior product quality, on-time delivery, documentation, and pricing. These items are measurable and data is used to improve the quality process.

Every employee understands that they are directly responsible for quality and customer satisfaction. Employees use the quality management system daily as they perform their assigned functions.
